Visit CompassTools at GIS In the Rockies, Aug-Sept 2011 ***Platinum Sponsor provides solutions for all GIS/GPS needs***

Centennial, CO (Aug. 30, 2011) – Visit Colorado-based CompassTools’ booth (#120) at GIS In the Rockies to experience the latest in GPS/GIS technology, including Trimble’s new breakthrough, Floodlight™. The 24th annual GIS In the Rockies conference is on Aug. 31-Sept. 1, at The Cable Center on the campus of Denver University.

“CompassTools has been working with GIS technology since 1994 and we are the ‘go-to’ company for all things geospatial,” said Steve Chiles, CEO of CompassTools. A value-added reseller of Trimble, Esri, Laser Technology and other manufacturers, CompassTools consults with its customers to put together the right combination of products and services for any geospatial-related project.

GIS In the Rockies is the premier trade show for the geospatial industry in Colorado and the Rocky Mountain Region. Attendees will learn how Geospatial Information Systems (GIS) technology is being used across industries from economic development to emergency response.

Geospatial equipment, both hardware and software, is improving constantly and this year a new technology called GNSS has been released by Trimble, as a component of Floodlight, which provides hundreds more channels for field data collection. CompassTools will have samples of the new products available for people to check out at the show booth.

WIN: CompassTools is giving away a TruPulse Laser Range Finder 360 from Laser Technology, Inc. Come by booth #120 and register!

Also, for every person who brings their own GPS hand-held device loaded with the Esri software ArcPad (8 or 10), CompassTools will load an evaluation copy of “LaserGIS-for-ArcPad” software onto their handheld and demonstrate its use. Each unit brought in will receive one entry to win a full copy of “LaserGIS-for-ArcPad.”

###

About CompassTools

CompassTools® is the leader in GeoSpatial field data collection tools since 1994. We provide certified support, service, repair, training, rentals and sales of the industry’s premier hardware and software solutions, including Trimble, Trimble Utilities Field Solutions, Esri, Laser Technology, Ricoh, CartoPac, and several custom lines. To discuss your GeoSpatial hardware and software needs or to learn more about CompassTools, visit us at www.CompassToolsInc.com or call us at 800-728-5066.
